### **Matrox announces new Millennium P650 PCIe 128 graphics card** First Millennium P-Series product for PCI Express has native x16 support

**Montreal, Canada, February 2, 2005** –Matrox Graphics Inc., the leading manufacturer of professional graphics solutions, announces the Millennium P650 PCIe 128 graphics card, the first Millennium P-Series product for PCI Express™. This product has full native x16 PCI Express support, 128 MB of graphics memory, and Matrox DualHead® for using two digital or analog monitors at a time.

"This graphics card brings to new PCI Express systems the quality, features, and reliability that our customers already enjoy with our current solutions for CAD, GIS, dispatch, and monitoring systems," says Sam Recine, product manager, Matrox Graphics. "We're please to bring the stability of our Millennium P-Series graphics cards to the PCI Express platform."

Using two monitors at a time, Millennium P650 PCIe 128 supports digital monitors at resolutions up to 1920 x 1200, or analog monitors up to 1920 x 1440. With a single analog monitor, the card supports up to 2048 x 1536. In addition, this product includes Matrox UltraSharp Display Output Technology, single- and multi-display acceleration for OpenGL® and Microsoft DirectX®, and high-quality display drivers for Microsoft® Windows® 2000 and Windows XP. Display drivers for the Linux® and Sun Solaris™ x86 operating systems will be available as upgrades.

#### **Pricing and availability**

The Matrox Millennium P650 PCIe 128 graphics card will be available in April 2005 at a list price of \$249 (USD). This product will be available from authorized resellers or directly from Matrox at <http://shopmatrox.com>. For more information, call Matrox Sales at 1-800-361-1408 or e-mail [technicalsales@matrox.com](mailto:technicalsales@matrox.com).
