Matrox announces new low-profile, PCI Express x16, DualHead graphics card

Montreal, Canada, May 25, 2005 - Matrox Graphics Inc., the leading manufacturer of professional graphics solutions, announces the Millennium P650 LP PCIe 64 graphics card, the first low-profile Millennium P-Series product for PCI Express. The product features native PCI Express x16 support, 64 MB of graphics memory, and Matrox DualHead® for using two digital or analog monitors at a time. This announcement follows other recent Matrox releases for PCI Express, including the now-shipping Matrox QID LP PCIe and Millennium P650 PCIe 128 products.

"PC makers and industrial computer builders are increasingly designing small form-factor computers," says Sam Recine, product manager, Matrox Graphics. "For such systems in mission-critical environments, Millennium P650 LP PCIe 64 is an ideal dual-display solution. The product builds on proven Millennium P-Series technology, offers the support and long product life-cycles that Matrox is renowned for, and adds to Matrox's growing family of PCI Express cards for industry and government."
