## **Matrox announces new Millennium G550 PCIe graphics card**

World's first PCI Express™ x1 graphics card featuring productivity-enhancing DualHead® support for PCI Express PCs

**Montreal, Canada, July 13th, 2005** — Matrox Graphics, the leading manufacturer of professional graphics solutions, announces Matrox Millennium G550 PCIe, the world's first PCI Express x1 graphics card, bringing advanced dual-display functionality to the financial, insurance, legal and general corporate use multi-display markets. Compatible with any compliant PCI Express slot due to its distinctive x1 design, this graphics card essentially doubles your desktop workspace by allowing output to a second digital or analog display, dramatically enhancing workflow and productivity.

"As the multi-display leader in the financial market, Matrox is pleased to announce the launch of our new Matrox Millennium G550 PCIe," says Jean-Levy Beaudoin, business development manager, Matrox Graphics. "Based on our Matrox Millennium G550 Series which epitomizes stability and reliability, the Matrox Millennium G550 PCIe is a perfect fit for multi-display professionals making the transition to PCIe platforms."

The Millennium G550 PCIe is equipped with 32 MB of DDR memory and provides exceptionally high-quality support with a maximum resolution of 1600 x 1200 per display. It also boasts multi-display features that include Matrox Clone and Matrox Multi-Display Zoom in addition to resolution support for Stretched and Independent desktop mode.

The Millennium G550 PCIe is supported by unified and WHQL-certified drivers that offer Matrox legendary stability and that deliver Matrox renowned, crystal-clear image quality. With the use of Matrox PowerDesk SE, a window management suite utility incorporated in the drivers, a financial or enterprise professional has the freedom to change display settings or access Matrox features effortlessly.

### **Pricing and Availability**

The Millennium G550 PCIe will be available in Q3 2005 at a list price of \$139 USD.
