JDS Digital Security Systems and Matrox Graphics announce partnership for advanced multi-display NVR security solutions

Montreal, Canada, March 22, 2006 — JDS Digital Security Systems and Matrox Graphics Inc. are proud to announce their collaboration in augmenting security monitoring workstations for the high-growth NVR (Network Video Recorder) market. Building on patented technology, JDS offers a full range of [NVR software](#) for corporate, government, and retail environments with their Softsite™ suite security management systems. Matrox is the leading provider of [multi-display graphics hardware](#) for computer-based surveillance systems world-wide.

"The ability to stream and view a large number of high-resolution video feeds is a highly desired function of our most demanding security clients, such as school systems, prisons, and casinos," says Joe Marchese, President, JDS Digital Security Systems. "JDS is proud to certify Matrox graphics cards with our Softsite Enterprise software because Matrox offers our NVR integrators the best in performance, features, product-line depth, image quality, long product life cycles, and technical support."

"The JDS Softsite Enterprise NVR software provides stellar camera recording and playback on computer-based surveillance systems," says Samuel Recine, Product Manager, Matrox Graphics. "The Softsite series fulfills the needs of large, medium, and small security monitoring environments. Through support and project development, Matrox has worked with many DVR and NVR packages, and JDS Softsite software is a leading performer for monitoring live and recorded IP streams, and is easy to configure, while offering a range of options."
