## **Matrox introduces Millennium P650 Low Profile PCI LVDS for embedded applications**

**Montreal, Canada, April 4th, 2006**—Matrox Graphics, Inc., the leading manufacturer of graphics solutions for professionals, today announced a new version of the Millennium P650 specifically designed for embedded applications. The Matrox Millennium P650 low-profile PCI LVDS boasts an exceptionally compact 5.2-inch long board design and dual LVDS outputs making it the ideal solution for kiosks and embedded solutions.

Leveraging it's core business of selling high value graphics boards into a wide variety of professional markets, Matrox is uniquely positioned to offer multiple options, a forward roadmap of GPU technology and broad driver support to third parties looking to add graphics capabilities to various embedded solutions.

Matrox will be attending Embedded Systems Conference in San Jose from April 4-6th in booth #5096 and is available for face-to-face discussions and technology demonstrations.

### **Pricing and Availability**

The Millennium P650 Low Profile PCI LVDS is available today directly from Matrox at a list price of \$279.00 with quantity discounts available. For more information, please contact Matrox Special Graphics sales at <http://www.matrox.com/graphics/en/contact/>
