Matrox announces Epica series graphics cards for thin clients

Montreal, Canada, June 20, 2006 — Matrox Graphics announces Epica series dual- and quad-display graphics cards designed for thin clients and other mission-critical systems. Epica products have new, innovative, server-based software from Matrox to manage [multi-display](#) configurations in remote sessions. The cards also feature support for 2 or 4 [digital and analog monitors](#) at a time, small form factors, low power consumption, passive (fanless) cooling, and [PCI bus interfaces](#).

"Epica series represents our continuing effort to bring reliable, high-quality, Matrox multi-display solutions to a wider variety of professional systems," says Samuel Recine, Business Development Manager, Matrox Graphics. "Epica products are ideal for mission-critical environments that need small, reliable, space-saving, low-power systems and the productivity advantages of Matrox multi-display technology."

The Epica series includes the TC4, TC2, and TC2-Lite models. [Epica TC4](#) supports 4 monitors at a time and has 128 MB of graphics memory. [Epica TC2](#) and [Epica TC2-Lite](#) support 2 monitors at a time and have 64 MB and 32 MB of graphics memory, respectively. All Epica products have display driver support for Microsoft® Windows® 2000, Windows XP, Windows XP Embedded (XPe), and Linux® operating systems, and support Microsoft RDP, Citrix ICA for Windows, and Linux rdesktop remote connection software.
