New Matrox DualHead2Go Digital Edition Now Shipping

Montreal, Canada, May 23, 2007 — Matrox Graphics Inc., the leading manufacturer of graphics solutions for professionals, is pleased to announce that the new DualHead2Go Digital Edition is now shipping. Part of our Graphics eXpansion Modules (GXM) product line, this external multi-display upgrade device allows you to connect two digital monitors to your notebook or desktop for an impressive, productivity enhancing, dual-monitor set-up.

“DualHead2Go Digital Edition supports a wide range of resolutions for users interested in using two DVI monitors,” says Caroline Injoyan, business development manager, Matrox Graphics Inc. “Upgrading to a dual-monitor configuration immediately provides multi-taskers with the maximum onscreen space to better manage multiple documents across two screens.”

Graphics eXpansion Modules

[Matrox Graphics eXpansion Modules \(GXM\)](#) are small external boxes that are simple to set up—there is no need to open the computer to insert additional parts. The operating system detects the GXM as an ultra-widescreen monitor which is then split into two or more standard resolutions, harnessing your system's existing 2D, 3D, and video acceleration graphics hardware.

System Compatibility

DualHead2Go Digital Edition includes support for Windows Vista™, Windows XP, Windows® 2000, Windows® XP-64 bit operating systems and Mac® OS X v10.4, and is compatible with many desktops and notebooks. For complete details, visit the online [compatibility page](#).

Price and Availability

DualHead2Go Digital Edition has a manufacturer's suggested retail price of \$229USD. This product is available from authorized resellers worldwide or, in North America and Europe, directly from Matrox at <http://shopmatrox.com>. For more information, call Matrox Sales at 1-800-361-1408 (North America) or e-mail insales@matrox.com.
