Matrox digital extension solution offers guaranteed image quality across multiple channels and iterations

Matrox Veos geared to drive multi-display digital signage to the next level with exponential expandability

Montreal, Canada, March 4, 2008—Matrox Graphics Inc., the leading manufacturer of graphics solutions for professionals, today announced the release of Matrox Veos™—an exciting, new multi-channel digital extension solution. Veos is capable of carrying multiple channels of content along a single copper-based cable with over 100 meters of extension per component across an unlimited number of iterations, with zero loss to image quality. Display more content at a greater distance—guaranteed.

"Matrox Veos is a natural evolution to our existing multi-display digital signage product line," says Ron Berty, business development manager, Matrox Graphics, Inc. "Combining Matrox multi-display expertise with digital extension allows digital signage customers to place displays wherever they are needed, not just in close proximity to one another. Veos brings this all together in one integrated package."

The Veos Components

Using a building block approach, Veos is comprised of three components that work in harmony to create highly flexible and easy-to-work-with installations. Each component also adds over 100 meters of digital extension:

- **Master unit**— connects to the computer and digitally extends graphics and display control data over 100m
- **Repeater/Replicator unit**— adds over 100m of digital extension for each of two outputs
- **Display unit**— has two independent display outputs, a display control output, and also adds over 100m of digital extension.

With support for a vast number of resolutions, including full 1080p HD, Veos includes RS-232 functionality for display control. Ideally suited for digital signage installations both simple and complex, Matrox Veos will not disappoint.

Availability

Matrox Veos will be available in early Q3 2008. For more information or to receive notification on product availability, visit www.matrox.com/graphics/veos or contact Matrox Sales at 1-800-361-1408 (North America) or digitalsignage@matrox.com.

About Matrox Graphics Inc.

Matrox Graphics is a leading manufacturer of specialized graphics solutions for professional markets such as finance, digital media, medical imaging, industrial, and enterprise computing. In-house design expertise, top-to-bottom manufacturing, and dedicated customer support make our solutions the premier choice in industries that require stable, high-reliability products. Fortune 1000 companies rely on our multi-display solutions—dual, quad, and beyond—to increase productivity and improve decision-making by enabling them to see more and do more.

Founded in 1976, Matrox is a privately held company headquartered in Montreal, Canada, with representation and offices in the Americas, Europe, and Asia.
