## **Matrox Veos set to drive digital signage to the next level**

Much anticipated multi-channel digital extension solution now available

**Las Vegas, June 18 /PRNewswire/ -- At Infocomm 2008,** — Matrox Graphics Inc., the leading manufacturer of graphics solutions for professionals, announced the availability of its new Matrox Veos™. This one-of-a-kind solution comprises three components – Master unit, Display unit, and Repeater unit – that work in harmony to create highly flexible and easy-to-work-with digital signage installations. A single computer is capable of carrying up to three channels of content along a single copper-based cable with over 100 meters of extension per component across an unlimited number of iterations—all this with zero loss to image quality.

"We're happy to announce the much anticipated arrival of Matrox Veos," says Ron Berty, business development manager, Matrox Graphics, Inc. "Whether your digital signage requirements are for 1 or 100 displays, Matrox Veos is the right choice as it combines multi-channel, digital extension, and unlimited iteration capabilities into one highly flexible and scalable solution—at a very effective price."

### **Key features**

Veos boasts a multitude of features suited for both simple and complex digital signage installations, including:

- Over 100 meters of digital extension per component
- Virtually unlimited iterations from a single computer
- Up to three content channels playing simultaneously
- Vast resolution support including full 1080p HD
- RS-232 functionality for display control

### **Pricing & Availability**

The Veos Master (Part # VS-MSTR-0F) and Display units (Part # VS-DSPL-0F) are now available. The optional Veos Repeater unit (Part # VS-RPTR-0F) will be made available in late Q3. MSRP for the Veos Master and Display units are \$995USD and \$795USD respectively.
