## **Matrox Graphics Unveils Triple and Quad Monitor DisplayPort M-Series Graphics Cards**

**Montreal, Canada, June 23, 2009/PRNewswire/** — Matrox Graphics, the leading manufacturer of specialized graphics solutions, today announced the availability of the [Matrox M9138](#) and [Matrox M9148](#) DisplayPort graphics cards. Expanding the M-Series product line, these new triple- and quad-monitor cards offer a remarkable 1 GB of memory, and with support for independent or stretched mode at resolutions up to 2560x1600 per output, users can drive business, industrial, and government applications on an exceptional multi-monitor platform.

"The first generation of Matrox DisplayPort graphics cards bring a tremendous amount of flexibility to today's DisplayPort users," says Samuel Recine, Director of Business Development, Matrox Graphics. "Not only can users choose any combination of pivoted, independent, or stretched displays, but also have the opportunity to combine two M9148 cards in a single system to drive up to eight DisplayPort or DVI monitors."

The Matrox M9138 and Matrox M9148 are low-profile graphics cards that make it easy to integrate into a wide variety of systems, and both offer optimal support for Windows® Vista Aero (WDDM mode).

### **Matrox M9138 and M9148 Key Features**

- Native PCIe x16 performance
- 1 GB of memory
- Drive three (M9138) or four (M9148) DisplayPort monitors at 2560x1600 per display
- Insert two M-Series cards into the same system to drive even more monitors
- Configure and manage program windows on multiple monitors with Matrox PowerDesk software
- Fanless design eliminates noise and increases product reliability

### **Availability and Pricing**

The Matrox M9138 and M9148 graphics cards will be available in Q3/2009.

- M9138 PCIe x16
- M9148 PCIe x16
