## **Matrox Announces Multiple Graphics eXpansion Module Support to Drive Even More Displays**

**Connect two Matrox DualHead2Go or TripleHead2Go units directly into your system to achieve a four- or six-monitor workspace**

**ISE 2010, Montreal, Canada, January 27, 2010** —Matrox Graphics Inc., the leading manufacturer of specialized graphics solutions, today announced multiple [DualHead2Go](#) and [TripleHead2Go Graphics eXpansion Module \(GXM\)](#) support to drive up to four or six monitors, respectively, from a single system. A second GXM can now be connected to the secondary output of a supported dual monitor graphics card so two DualHead2Go GXMs can power up to four outputs in 2x2 or 4x1 modes, while two TripleHead2Go units can be combined to connect six displays to produce either a 3x2 or 6x1 set up.

"Multi-GXM support offers a tremendous amount of flexibility by simply having to connect the GXMs externally to your system or workstation," says Ron Berty, Business Development Manager, Matrox Graphics. "Business professionals for example, can now conveniently upgrade to a four- or six-monitor workspace to run additional applications for real-time viewing. Additionally, AV specialists can effortlessly build six-screen presentation or digital signage platforms to drive dynamic, digital messaging while benefiting from the natural synchronization of the screens being driven by a single GPU."

Matrox currently offers multi-GXM support with the 2.06 (or above) GXM software suite. A maximum of two GXMs—of the same make and model—can be connected to a supported graphics card with two available outputs of the required type. Multi-GXM stretched desktop mode is available with Matrox M-Series cards, while independent desktop support is available with supported M-Series, ATI, and NVIDIA graphics cards. For complete details, [visit the Multi-GXM page](#).

Matrox partners will be showcasing this technology, alongside a wide range of Matrox digital signage graphics solutions, at [Integrated Systems Europe 2010](#), RAI, Netherlands, from February 2-4.

## **Availability and Pricing**

Matrox Graphics eXpansion Modules are available for purchase from authorized resellers worldwide, or in North America and Europe, directly from [ShopMatrox.com](http://ShopMatrox.com).

- Matrox DualHead2Go Analog Edition – Part number: D2G-A2A-IF \$169 USD
